Subject: Re: Response Training Support

EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife.

Please see our website for the latest information: <http://www2.epa.gov/region8/gold-king-mine-release-emergency-response>

Regular updates will be posted as they are available.

Subject: Response Training Support

Good morning.

No doubt you are up to your elbows with the recent spill into the Animas River, etc. As the Manager of Hazardous Materials/Waste worker training here at the University of Utah, I want to offer our services in meeting the safety and health training needs to you and your contractor teams. We are capable of mobilizing into the area and setting up training to meet the training requirements under the Hazwoper standard found in 29 CFR 1910.120.

Please feel free to contact me at either number below for additional information regarding this support.

Michael Hampton CSP, ARM

University of Utah – RMCOEH
